

RODRIGO GUEVARA CIVIT

FULL STACK DEVELOPER

PERSONAL PROFILE

I am a Full Stack Web Developer. I can work with the following technologies: React, Redux, Express, Sequelize, CSS, HTML and Postgres. I feel qualified to develop projects in groups or individually.

I consider myself a proactive person, always eager to continue learning new technologies.

TECHNOLOGIES

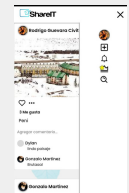

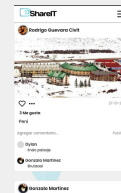

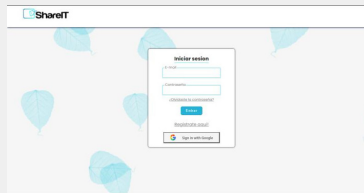

MY WORKS

SOCIAL NETWORK

SHARE IT

- This App is a social network, which was made in group, where in the front part we implement ReactJs, Redux and Css for its design.
- User registration with google login and first time registration can be done using Firebase technology.
- In the back part, ExpressJs and Postgres SQL technology were used for the database and Sequelize to relate it.

- You can see how its works here :link <https://share-it-tawny.vercel.app/>

VIDEOGAMES APP

- Development of a SPA that shows video game cards, with dynamic paging.
- It allows you to search for them by name and by ID. You can filter alphabetically by genres, names; by rating and by existing in the api or created by the user.
- Users can create their own videogame through a controlled form.
- The technologies used for the Front were React , Redux and pure Css
- The back was done with NodeJS , Express, PostgreSQL and Sequelize database.
